

COMPACT TOILET FOR COMPACT BATHROOMS

The smallest, most effective composting toilet design from the EcoLet™ range.

EcoLet™ Separera Mini is a small batch system that comes with two interchangeable 15L solids chambers and features urine diversion to separate solids and liquids.

EcoLet™ Separera Mini is the perfect choice for tiny homes and cabins, holiday homes, sleepouts, granny flats and RVs.

- Small and compact
- Urine diversion system
- Built-in chamber screen
- Easy on-floor install

Capacity:	2 people full time
Dimensions(mm):	500L x 400W x 500H
Volume:	2 x 15L solids chambers. Urine Container model comes with an 8L urine container.
Electrical Rating:	12v

THE ECOLET™ SEPARERA MINI IS AVAILABLE IN TWO MODELS:

Separera Mini Urine Container

Urine is collected in an 8L container within the pedestal. This means that there is no drainage at the base of the unit, and it is fully self-contained.

Separera Mini Urine Extraction

Urine is drained away from the pedestal through a sullage hose. This can be directed into an evaporation tank, through a filtration system, into a dedicated soak-pit or into a collection tank.
