

Leading the way in waterless composting toilets for over 35 years

## NL2

Self-contained, easy to install and requiring minimal maintenance, the NL2 is ideal for those needing a temporary toilet solution whilst building a house, for weekenders or as an affordable alternative to a drop toilet. Unlike other systems, once installed the pedestal remains in place with only the internal compost chamber required to be changed.

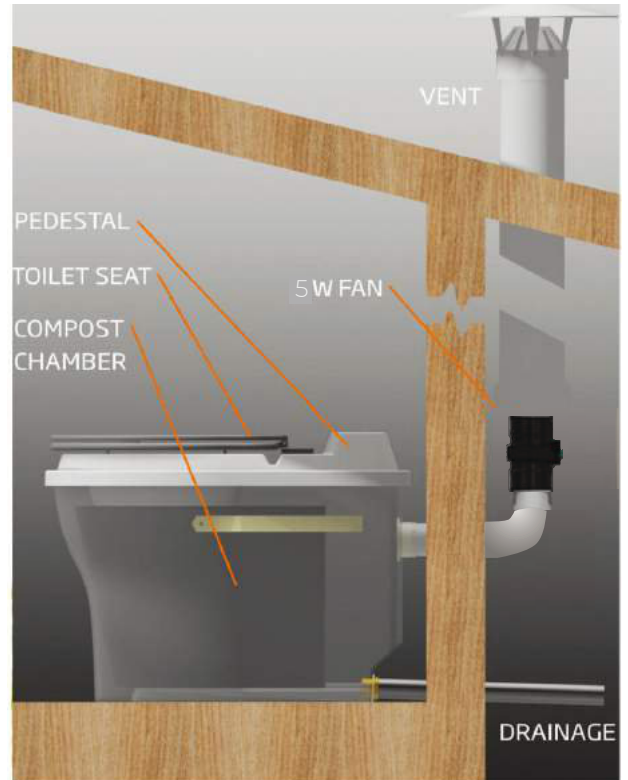

### Key Features:

- Compact
- Easy to Install
- Low Maintenance
- Sits directly on the bathroom floor
- 100% waterless & 100% nature

### Specification

Capacity	Full time: 2 person use Part time: 4 person use
Power usage	12 Volt 5 Watt
Floorspace Required	On floor unit
Materials	LDPE
Dimensions	620 L x 395 W x 500 H mm
Water Consumption	Waterless
Solar Options	
Warranty PEDESTAL	2 years warranty

The NL2 uses the process of organic decomposition to break down waste into safe compost. Removal of the compost chambers is as easy as opening the toilet lid, removing the compost chamber and replacing it with an empty one.

A 12volt 5watt fan aids the composting process and removes any odours.

Once installed there is no need to disconnect anything because, unlike other low-cost waterless composting toilets, the NL2 pedestal remains in place with only the internal compost chamber changing. The NL2's capacity can be increased by introducing additional composting chambers.

### What will you get?

NL2 package includes:

- 2 x Composting chambers & lids
  - White toilet seat & pedestal, also available in Black
  - 12 volt 5 watt fan in housing and transformer\*
  - Easy to follow DIY Installation and Maintenance manual.
