

SUN-MAR MOBILE™

The **Sun-Mar Mobile** waterless toilet has been specifically designed to continue operating under the normal stresses onboard a mobile home or boat. The system has sufficient processing capacity to allow several weeks of coastal water or mobile home use without recourse to pump out facilities. **This product is available by special order only.**

Advantages of the Mobile waterless toilet:

- ✓ Minimal maintenance
- ✓ Simple installation
- ✓ Craft/vehicle weight/fuel consumption reduced
- ✓ Product reliability with over 30 years' experience in manufacturing waterless toilets
- ✓ No odours
- ✓ No water tank
- ✓ No pumps or valves
- ✓ No chemicals
- ✓ Minimal waste

Price: \$2,200 including GST ex Brisbane factory

Unit Height	71.1 cm
Unit Width	48.3 cm

Fan	4 watt
	12 volt
Heater	80 watt (average)
	12 volt

Ventilation:

The Mobile uses only a 12 volt 4 watt fan which vents via a 3 inch pipe. The fans are installed in boxes together with zeolite and carbon filters to eliminate odours at deck or roof level. The fan is connected to a vertically mounted vent pipe. A deck or roof vent is not supplied but should be installed such that water is prevented from entering the system. Solar vents are very affordable and effective since they can take over the job of the 12 volt fan during the daylight hours.

Heating:

The mobile has a 12 volt 160 watt (80 watt average) thermostatically controlled heater
